

## Proyecto SEQUIAN

### Congresos

Presentación de resultados del proyecto en Congresos Internacionales:

- 39th IAHR World Congress, 2022. From Snow to Sea (Granada, Spain, 19-24/06/2022).
  1. Analysis of the relationship between meteorological and hydrological droughts in the Guadalquivir river basin.
  2. Future changes in drought characteristics over the Iberian Peninsula.
  3. Multi-Objective Performance of a Macroscale Hydrologic Model in Southern Spain under Present Climate.
  4. Assessing the predictive skill of drought with high-resolution decadal climate predictions in the Iberian Peninsula.
- EMS Annual Meeting 2021 (Online, 3-10/09/2021).
  1. Evaluation of the relationship between meteorological and hydrological droughts in the southern Iberian Peninsula.
- EGU General Assembly 2021 (Online, 19-30/04/2021).
  1. An assessment of the impact of initial soil conditions on drought and precipitation extremes by using a high-resolution regional climate model.
